

Frequently Asked Questions as provided to GWA by Sodexo

- Q. I think my child/young person has an allergy to certain foods but I am not sure. What should I write on the form?**
- A. If you think your child/young person has a food allergy then we strongly advise you to seek the advice of either a medical or nutritional professional to obtain further information as soon as possible. If you tell us that your child/young person has an allergy, but you do not yet have an assessment of their condition from either a doctor or a dietician, their diet will be restricted to foods which our catering partner Sodexo believes are unlikely to induce any allergic reaction. Once you have been able to provide a doctor or dietician's assessment of your child/young person's condition we will be able to offer them a wider menu appropriate to their needs.
- Q. Why do you need to receive a doctor/dietician's assessment before you will feed my child/young person?**
- A. Food allergens can cause life-long health issues and in certain circumstances cause death. We do not want to place any child/young person in the position where their health or their life could be at risk. Without a doctor/dietician's assessment we cannot be certain that we are providing a child/young person with a diet that is appropriate for their health needs.
- Q. I have already told you verbally about the food allergy, why do I need to fill in a form?**
- A. We need to keep a written record with details of any food allergies that your child/young person has so that we can share it in an emergency with medical professionals. We also need to ensure that we are sharing accurate information about your child/young person's food allergy with Sodexo who are the company that provide our catering.
- Q. Can your catering partner Sodexo promise to provide food that is created and served in 'nut free' environments?**
- A. Sodexo is unable to commit to ensuring that any establishment that it provides food to will be completely 'nut free'. Whilst Sodexo does not use whole peanuts or tree nuts as ingredients within its premises (unless specifically requested to do so), some of those ingredients come from manufacturers who have placed a 'may contain traces of peanuts or tree nuts' label on them. This means that food produced using these ingredients cannot be claimed to be 'nut free'.
- Q. My child/young person has packed lunch. Why do I need to complete the form?**
- A. In certain educational establishments, children/young people who eat meals prepared by our caterers will sit with those who eat packed lunches. Some children/young people with food allergies can suffer a reaction by either coming into contact with or being in close proximity to the particular ingredient that they are allergic to. By understanding which child/young person has a food allergy we are able to limit the potential of an incident occurring.
