

Psychology

Create a time line looking at the history of psychology and how it has developed over time. You need to research the following psychologists and place them in chronological order.

- Wundt
- Skinner
- Bandura
- Freud
- Milgram
- Zimbardo
- Maslow
- Pavlov

When researching the different psychologists you need to find the following information and add information on your timeline:

- What psychological approach do they belong to? Biological Approach, Behavioural/ Learning Approach, Cognitive Approach, Psychodynamic Approach, Humanistic Approach or the Social Approach.
- What year they conducted their research?
- A brief outline of their research explaining what they did and what they found.

This information needs to be presented in a poster format and can be done either on the computer or by hand.
