

Sociology

Welcome to Sociology! We will be studying lots of different areas in Year 12 from looking at culture and identities to social inequalities and the impact of globalisation on society.

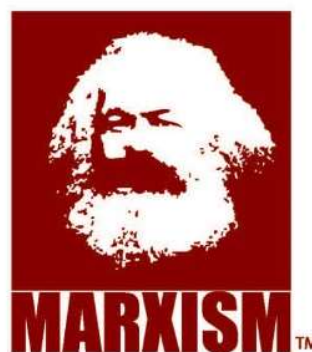

Knowing your key sociological approaches is essential; so over the summer holidays create a fact file about the following to approaches in sociology:

1. Functionalism
2. Marxism
3. Feminism
4. Post-modernism
5. New Right
6. Weberianism

For each approach make sure you include:

- Sociologists who support this approach
- At least 5 main beliefs of the approach. What is their view on society?
- Examples of areas that have been studied by each of the approaches
- Your opinion on each. What do you think the strengths and weaknesses are of each theory?
